

EP TECHNOLOGY 5.0 24mm straightening iron

Offers XXL size plates 24mm x 120mm

EP TECHNOLOGY 5.0

This is a very technical process similar to what is done in jewelry. Its achievement lasts a long time as this is about getting a layer of micrometric metallic particles by electroplating.

- ▶ no friction for even more smoothness
- ▶ no chemical agents for better resistance to high-heat
- ▶ even heat distribution all through the plates

For plates:

1. 3 x harder & longer lasting*
2. 3 x smoother
3. hard-wearing to chemicals
4. lasting & perfect straightening
5. hair respected & sublimated

For perfect, long-lasting results:

- preserves the integrity of the hair
- hair is soft and shiny
- even heat distribution makes faster styling results that last longer

For intensive professional use:

- perfect resistance to wear-out, chemical products and high-heat
- even smoother plates
- time and energy savings

Advanced Heat Management™ system

The straightener integrates the latest self-regulating heating element, the Advanced Heat Management™, which gives accurate and continuous electronic control of the temperature. Because of this technology, the unit offers immediate heat-up, a very high temperature, temperature stability to the nearest half degree and very quick reaction and recovery times.

Perfect results

The hi-tech heating element provides even heat distribution all through the plates

The high performance of the appliance allows use on any length of hair even the longest one and its ultra-thin design lets it get as close as possible to the head for use on short hair

Temperature control from 115°C to 230°C allows use on any type of hair from the most fragile to the most difficult one, from the thinnest to the coarsest one

- ▶ perfect straightening for all hair types from natural hair extensions to ethnic hair

Its curved design also creates perfect curls

BaBylissPRO™

Exclusively for Hair Artists

* Compared to Nanotitanium Sol-Gel plates

Safety & energy saving

Storage pouch and heat-resistant mat

- ▶ during use, always let the unit rest on the insulated mat to protect your surfaces

Ecofriendly

- ▶ 200W starting power reduced to 60W during the stabilization phase for energy consumption saving

Features

- EPTECHNOLOGY 24mm x 120mm plates
- Advanced Heat Management System™: immediate heat-up
- Temperature selector – 5 settings (115°C – 140°C – 170°C – 200°C – 230°C)
- On/off switch & indicator light
- Professional 2.70m swivel cord
- Storage pouch & heat-resistant mat
- Ultra-lightweight (230g)
