

# EP TECHNOLOGY 5.0 25 mm straightening iron

## Removable comb for improved control of the hair strand

### EP TECHNOLOGY 5.0

This is a very technical process similar to what is done in jewelry. Its achievement lasts a long time as this is about getting a layer of micrometric metallic particles by electroplating.

- ▶ no friction for even more smoothness
- ▶ no chemical agents for better resistance to high-heat
- ▶ even heat distribution all through the plates

#### For plates:

1. 3 x harder & longer lasting\*
2. 3 x smoother
3. hard-wearing to chemicals
4. lasting & perfect straightening
5. hair respected & sublimated

#### For perfect, long-lasting results:

- preserves the integrity of the hair
- hair is soft and shiny
- even heat distribution makes faster styling results that last longer

#### For intensive professional use:

- perfect resistance to wear-out, chemical products and high-heat
- even smoother plates
- time and energy savings

### Advanced Heat Management™ system

The straightener integrates the latest self-regulating heating element, the Advanced Heat Management™, which gives accurate and continuous electronic control of the temperature. Because of this technology, the unit offers immediate heat-up, a very high temperature, temperature stability to the nearest half degree and very quick reaction and recovery times.

### Perfect results

The hi-tech heating element provides even heat distribution all through the plates

The high performance of the appliance allows use on any length of hair even the longest one whereas the temperature control from 140°C to 230°C lets it to be used on any type of hair from the most fragile to the most difficult one, from the thinnest to the coarsest one

The removable comb can be put either on the left or the right side of the upper plate for a better control of the hair strand

# BaBylissPRO™

*Exclusively for Hair Artists*

\* Compared to Nanotitanium Sol-Gel plates

## Safety & energy saving

Locking system for an even faster heat up and safer storage

Ecofriendly

- ▶ 40W during the stabilization phase for energy consumption saving

Worldwide voltage

## Features

- EPTECHNOLOGY 25mm x 90mm plates
- Advanced Heat Management System™: immediate heat-up
- Temperature selector – 5 settings (**140°C - 160°C - 190°C - 210°C - 230°C**)
- Removable comb and locking system
- On/off switch & indicator light
- Professional 2.70m swivel cord
